ST18 0AR

EU office - 22 Northumberland Road, Dublin 4., Ballsbridge, Dublin, Ireland

Product type covered by this Declaration

Antimicrobial Additives

Product names covered

- Biomaster 1018 - Masterbatch

Compliance with Regulations

The products referred to above are listed in reference to the following regulations/Directives:

COMMISSION REGULATION (EC) No 987/2008 of 8 October 2008 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) as regards Annexes IV & V – the antimicrobial additive formulations have been examined and to the best of our knowledge Addmaster can confirm that they meet with the requirements of the Regulation where necessary.

The Antimicrobial element of Biomaster 1018 is registered under the Biocide Products Regulation (Regulation 528/2012 of the European Parliament and of the Council of 22 May 2012 concerning the making available on the market of biocidal products) and therefore the uses of the Biomaster products in biocidal applications are exempt from

the REACH registration requirements.

Addmaster can also confirm that Biomaster 1018 does not contain any substances on the Candidate list of Substances of Very High Concern for Authorisation published in accordance with Article 59 (10) of REACH regulation. This is in reference to Candidate list 19th January 2021 containing 211 substances.

Additional Comments

Please note that Addmaster (UK) Ltd. does not carry out specific analysis in order to detect the presence of any contaminating substances.

The information given here is based on our current knowledge and experience. It is only intended to provide general details about our antimicrobial additives. As the application is outside our control, the information is given without legal responsibility. Customers should test under their own conditions to ensure that the antimicrobial additive is suitable for their own requirements

Traceability

Addmaster (UK) Ltd has in place the necessary system, records and procedures to ensure traceability of materials and products in order to facilitate any necessary control and recall of product
